KARTHIK BIDARKUNDI

Bengaluru, India | +91 8217545841 | karthikbidarkundi@gmail.com | GitHub | LinkedIn

Summary

AI/ML engineering undergraduate with hands-on experience building AI and computer vision projects, including real-time detection systems and LLM-powered applications. Working knowledge of Python and SQL, with growing experience in prompt design and structured LLM outputs. Interested in AI/ML engineering, computer vision, and applied LLM roles.

Education

JSS Academy of Technical Education — Bengaluru, India
B.E. in Artificial Intelligence and Machine Learning (AIML) — 2023 – 2027

Technical Skills

Languages: Python, SQL
AI & ML: Machine Learning, Generative AI, Computer Vision, Deep Learning (CNN), LLM Integration
CS Fundamentals: Data Structures and Algorithms, DBMS, Computer Networks
Tools: OpenCV, Git, Streamlit, Groq API, GPS/IoT Integration

Projects

AI Resume Analyzer | *Python, Streamlit, Groq API, Plotly, ReportLab*
https://github.com/karthikSBidarkundi15/resume-analyzer-ai

- Built a role-aware resume analyzer that returns structured JSON feedback – ATS score, missing keywords, and bullet-point rewrites – for a selected target role.
- Deployed on Streamlit Community Cloud with a downloadable PDF report and visual score gauges.

Gram Yatra | *Python, GPS/IoT, Mobile/Web*
https://github.com/karthikSBidarkundi15/gram-yatra

- Real-time public transport tracking system for small cities, with an SMS fallback for low-connectivity areas.

AI-Based Interview Training & Proctoring System | *Python, Computer Vision*
https://github.com/karthikSBidarkundi15/AI-Based-Interview-Training-and-Proctoring-System

- Interview simulation platform with resume-based questions, real-time performance/emotion analysis, and face/eye-tracking based proctoring.

Smart Emergency Vehicle Priority System | *Python, Computer Vision (Ongoing)*
https://github.com/karthikSBidarkundi15/Smart-Emergency-Vehicle-Priority-System-Using-AI

- Computer vision pipeline that detects emergency vehicles in traffic feeds and dynamically prioritizes signals.

AI Powered Multi-Interview Simulator | *Python, Conversational AI*
https://github.com/karthikSBidarkundi15/Ai-multi-interview-simulator

- Conversational AI platform simulating role-based interview rounds with real-time feedback and a scalable, modular architecture.

Face Mask Detection | *Python, OpenCV, CNN*
https://github.com/karthikSBidarkundi15/face-mask-detection

- Real-time mask detection on live video using OpenCV and a CNN-based deep learning model.

Certifications

Data Structures and Algorithms (2025) | Computer Networks (2025)

Achievements

- Member, AI Club – JSSATE Bangalore; engaged in workshops and group discussions.
- Selected in the internal hackathon round for Smart India Hackathon (SIH) 2025, hosted at JSSATE, Bangalore.
